

# RESEARCH ASSOCIATE

## Summary

Apata Insights, a leading research organisation based in Kampala, Uganda, seeks a highly skilled Research Associate to contribute to our mission of delivering exceptional research solutions in the developing world. We are committed to driving data-driven insights that inform critical decisions and foster positive change.

As a Research Associate, you will play a pivotal role in the entire research lifecycle, from conceptualisation to execution and dissemination. You will collaborate with a dynamic team of experts to design, conduct, and analyse complex research projects. Your work will have a direct impact on shaping our research agenda and delivering actionable recommendations to our clients.

## Responsibilities

- Lead and contribute to quantitative research projects, including data collection, analysis, and interpretation.
- Develop innovative research methodologies and statistical models to address complex research questions.
- Produce high-quality research reports and presentations that effectively communicate findings to diverse audiences.
- Collaborate with cross-functional teams to ensure alignment with organisational goals.
- Mentor and develop junior research staff.

## Qualifications

- Advanced degree (Master's or PhD) in a quantitative field (Statistics, Economics, Econometrics, or related).
- At least 5 years of related experience
- Proven track record in conducting rigorous quantitative research.
- Proficiency in statistical software packages (Stata, R, Python).
- Experience with data management and analysis tools.
- Strong analytical and problem-solving skills.
- Excellent written and verbal communication skills.
- Ability to work independently and as part of a team.
- Experience designing CAPI-based data collection platforms (Survey CTO, ODK, Survey Solutions).
- Demonstrated experience in scientific writing (journal publications preferred).

## Demonstrate Your Expertise

At Apata Insights, we value unique talent and innovative approaches. In addition to your CV and cover letter, we welcome you to submit any creative samples that showcase your research expertise. This could include any of, but not limited to:

- Published blog posts or articles demonstrating your research capabilities.
- Data visualisations that effectively communicate complex research findings.
- Presentations you've delivered that highlight your communication skills.

By sharing these additional materials, you'll have the opportunity to stand out and give us a deeper understanding of your skills and contributions.

## Investing in Your Future

This role at Apata Insights offers more than just a job. We are committed to professional development and growth for our team members. As you excel, you'll have opportunities to advance your career in the organisation and the industry.
